

Climate

Introduction

According to the Lancet Commission, “Tackling climate change could be the greatest global health opportunity of the 21st century.” Climate change is the most serious and pressing environmental issue and emerging threat to human health. Practice Greenhealth looks forward to learning about and celebrating your climate change mitigation, resilience, and communication efforts to date.

Greenhouse Gas Emissions

Addressing climate change is a multi-step process that includes understanding the facility's impact, tracking the facility's impact, and mitigating the facility's impact. This section of the application will help you understand different **greenhouse gas** emissions reporting categories relevant to health care. Practice Greenhealth has developed a **Greenhouse Gas Reduction Toolkit** to walk you through this process.

Practice Greenhealth is autocalculating your facility's energy-related **greenhouse gas (GHG)** emissions from the Energy page and has entered them in the appropriate Scope Emissions tables below. Practice Greenhealth autocalculates the facility's **GHG** emissions from mobile fuel combustion from fleet vehicles on the Transportation page, from waste anesthetic gases on the Greening the OR page, and for meat-by-category from the Food page. If you have questions about **GHG** calculations and conversion factors, please refer to our **Guidance on Greenhouse Gas (GHG) Emission Calculations**.

Practice Greenhealth also calculates the percent reduction in GHGs from baseline and previous year for your facility. In order to be included in the percent reduction from baseline calculation for **Scope 1** emissions, the facility must enter a baseline year value for that category. Please direct questions on **GHG** calculations or data entry to **Keith Edgerton**, Associate Director, Climate Solutions.

Please enter your facility's annual **Scope 1 GHG emissions** in **Tables A1 through A3**. Please enter all data in **Metric Tons of Carbon Dioxide Equivalents (MTCO2e)**.

Table A1. Scope 1 Greenhouse Gas Emissions

Scope 1	Baseline Year (MTCO2e)	Previous Year (MTCO2e)	Current Year (MTCO2e)	Percent Reduction from Baseline	Percent Reduction from Previous
Stationary Combustion of Fuels (E.g. Boilers, generators, onsite incinerators, etc.)	<u>1.*</u> 0	<u>2.*</u> 0	<u>3.*</u> 0	<u>4.*</u> 0	<u>5.*</u> 0
Mobile Fuel Combustion by Fleet Vehicles	<u>6.*</u> 0	<u>7.*</u> 0	<u>8.*</u> 0	<u>9.*</u> 0	<u>10.*</u> 0
Refrigerants (Fluorinated Gases)	<u>11.*</u>	<u>12.*</u>	<u>13.*</u>	<u>14.*</u> 0	<u>15.*</u> 0
Waste Anesthetic Gases (Process Emissions)	<u>16.*</u> 0	<u>17.*</u> 0	<u>18.*</u> 0	<u>19.*</u> 0	<u>20.*</u> 0
Total Scope 1 Emissions	<u>21.*</u> 0	<u>22.*</u> 0	<u>23.*</u> 0		

GHG emissions from stationary fuel combustion, mobile fuel combustion and waste anesthetic gases are autocalculated from data received in other areas of the application.

Practice Greenhealth modeled its **GHG** reporting categories on **The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (GHG Protocol)** by the World Resources Institute (WRI) and the World Business Council for Sustainable Development (WBCSD).

The **GHG** Protocol recommends quantifying two different **Scope 2** emissions totals, using a **location-based method** and a **market-based method**. The organization should quantify and report both totals if conducting its own comprehensive **GHG** inventory. Practice Greenhealth autocalculates the facility's **Scope 2 GHG** emissions using the **location-based method**. For examples from different hospitals, see the Practice Greenhealth's **Conducting a GHG Inventory** or the **Addendum for Location and Market-Based Methodologies**.

Table A2. Scope 2 Greenhouse Gas Emissions (Location-based)

Scope 2 (location-	Baseline Year (MTCO2e)	Previous Year (MTCO2e)	Current Year (MTCO2e)	Percent Reduction from	Percent Reduction from
--------------------	------------------------	------------------------	-----------------------	------------------------	------------------------

based)				Baseline Year	Previous Year
Purchased Electricity	<u>24.*</u> 0	<u>25.*</u> 0	<u>26.*</u> 0	<u>27.*</u> 0	<u>28.*</u> 0
District Steam	<u>29.*</u> 0	<u>30.*</u> 0	<u>31.*</u> 0	<u>32.*</u> 0	<u>33.*</u> 0
District Hot Water	<u>34.*</u> 0	<u>35.*</u> 0	<u>36.*</u> 0	<u>37.*</u> 0	<u>38.*</u> 0
District Chilled Water	<u>39.*</u> 0	<u>40.*</u> 0	<u>41.*</u> 0	<u>42.*</u> 0	<u>43.*</u> 0
Total Scope 2 Emissions	<u>44.*</u> 0	<u>45.*</u> 0	<u>46.*</u> 0		

47.* Is the facility tracking **market-based Scope 2 GHG** emissions? (optional)

- ☒ Yes
☐ No

For more information on tracking Market-Based **Scope 2** Emissions, see Practice Greenhealth's **Greenhouse Gas Reduction Toolkit**. The market-based approach is a more comprehensive carbon accounting process for **Scope 2** emissions than the location-based method. If the facility is unsure if it is tracking **market-based Scope 2 emissions**, please reply No to this question. **Market-based Scope 2 emissions will not be included in auto-calculations for total GHG emissions.**

Scope 2 Greenhouse Gas Emissions (Market-Based)

Scope 2 (Market-based)	Current Year (MTCO2e)
Purchased Electricity	<u>47.a*</u> 0
District Steam	<u>47.b*</u> 0
District Hot Water	<u>47.c*</u> 0
District Chilled Water	<u>47.d*</u> 0
Total Scope 2 (Market based) Emissions	<u>47.e*</u> 0

Table A3. Scope 3 Greenhouse Gas Emissions

Scope 3	Baseline Year (MTCO2e)	Previous Year (MTCO2e)	Current Year (MTCO2e)	Percent Reduction from Baseline	Percent Reduction from Previous
Purchased Meat/Poultry from Food page	<u>48.*</u> 0	<u>49.*</u> 0	<u>50.*</u> 0	<u>51.*</u> 0	<u>52.*</u> 0
Purchased Goods or Services (except Meat)	<u>53.*</u> 0	<u>54.*</u> 0	<u>55.*</u> 0	<u>56.*</u> 0	<u>57.*</u> 0
Capital Goods	<u>58.*</u> 0	<u>59.*</u> 0	<u>60.*</u> 0	<u>61.*</u> 0	<u>62.*</u> 0
Fuel and Energy-Related Activities (not in Scope 1 or 2)	<u>63.*</u> 0	<u>64.*</u> 0	<u>65.*</u> 0	<u>66.*</u> 0	<u>67.*</u> 0

Transportation and Distribution	<u>68.*</u> <input type="text"/>	<u>69.*</u> <input type="text"/>	<u>70.*</u> <input type="text"/>	<u>71.*</u> <input type="text"/>	<u>72.*</u> <input type="text"/>
Waste Generated in Operations	<u>73.*</u> <input type="text"/>	<u>74.*</u> <input type="text"/>	<u>75.*</u> <input type="text"/>	<u>76.*</u> <input type="text"/>	<u>77.*</u> <input type="text"/>
Business Travel	<u>78.*</u> <input type="text"/>	<u>79.*</u> <input type="text"/>	<u>80.*</u> <input type="text"/>	<u>81.*</u> <input type="text"/>	<u>82.*</u> <input type="text"/>
Employee Commuting	<u>83.*</u> <input type="text"/>	<u>84.*</u> <input type="text"/>	<u>85.*</u> <input type="text"/>	<u>86.*</u> <input type="text"/>	<u>87.*</u> <input type="text"/>
End of Life Treatment of Sold Goods	<u>88.*</u> <input type="text"/>	<u>89.*</u> <input type="text"/>	<u>90.*</u> <input type="text"/>	<u>91.*</u> <input type="text"/>	<u>92.*</u> <input type="text"/>
Leased Fleet Vehicles from Transportation page	<u>93.*</u> <input type="text"/>	<u>94.*</u> <input type="text"/>	<u>95.*</u> <input type="text"/>	<u>96.*</u> <input type="text"/>	<u>97.*</u> <input type="text"/>
Leased Assets (except Fleet Vehicles)	<u>98.*</u> <input type="text"/>	<u>99.*</u> <input type="text"/>	<u>100.*</u> <input type="text"/>	<u>101.*</u> <input type="text"/>	<u>102.*</u> <input type="text"/>
Other Scope 3	<u>103.*</u> <input type="text"/>	<u>104.*</u> <input type="text"/>	<u>105.*</u> <input type="text"/>	<u>106.*</u> <input type="text"/>	<u>107.*</u> <input type="text"/>
Total Scope 3 Emissions	<u>108.*</u> <input type="text"/>	<u>109.*</u> <input type="text"/>	<u>110.*</u> <input type="text"/>		

Please Note: Table A3. does not include all categories of **Scope 3 GHG** emissions. If the organization is generating and tracking **Scope 3 GHG** emission categories other than those listed, please enter this value (in **MTCO2e**) in the box for **Other Scope 3** above. To learn more about the suggested categories to start with in **Scope 3**, see the Practice Greenhealth **GHG** Toolkit section on **Conducting an Inventory**.

Table A4. Total GHG Emissions

Table A4 shows the sums of all numbers entered for **Scope 1**, 2 and 3 emissions in Tables A1, A2, A3, (and B1 if applicable). Energy-related **Scope 1** and 2 **GHG** emissions is the sum of Stationary Combustion of Fuels emissions in **Scope 1** (Table A1) and all **Scope 2 GHG** emissions (Table A2).

	Baseline Year (MTCO2e)	Previous Year (MTCO2e)	Current Year (MTCO2e)
Energy-related Scope 1 and 2 Emissions	<u>111.*</u> <input type="text"/>	<u>112.*</u> <input type="text"/>	<u>113.*</u> <input type="text"/>
Total GHG Emissions	<u>114.*</u> <input type="text"/>	<u>115.*</u> <input type="text"/>	<u>116.*</u> <input type="text"/>

Table A5. Sums and percent change for emissions tracked for both BASELINE and current years

Table A5 measures **percent change in GHG emissions from baseline year** for all scopes. Categories of emissions are only included if they have non-zero values in both baseline and current columns. For example, if the baseline value for **GHG** emissions for Mobile Fuel Combustion from Fleet Vehicles in Table A1 is blank or zero, then any current year value for **GHG** emissions for Mobile Fuel Combustion from Fleet Vehicles in Table A1 will not be added into the current year emissions total used to calculate percent change for either **Scope 1 GHG** Emissions or **Total GHG** Emissions in Table A5.

Energy-related **Scope 1** and 2 **GHG** Emissions is the sum of Stationary Combustion of Fuels in **Scope 1** (Table A1) and all **Scope 2 GHG** emissions (Table A2).

	Baseline Year (MTCO2e)	Current Year (MTCO2e)	Percent Reduction from Baseline Year
Total Scope 1 GHG Emissions with Baseline and Current Year Values	<u>117.*</u> <input type="text"/>	<u>118.*</u> <input type="text"/>	<u>119.*</u> <input type="text"/>
Total Scope 2 GHG Emissions with	<u>120.*</u> <input type="text"/>	<u>121.*</u> <input type="text"/>	<u>122.*</u> <input type="text"/>

Baseline and Current Year Values	0	0	0
Total Scope 3 GHG Emissions with Baseline and Current Year Values	<u>123.*</u> 0	<u>124.*</u> 0	<u>125.*</u> 0
Energy-related Scope 1 and 2 Emissions with Baseline and Current Year Values	<u>126.*</u> 0	<u>127.*</u> 0	<u>128.*</u> 0
Total GHG Emissions with Baseline and Current Year Values	<u>129.*</u> 0	<u>130.*</u> 0	<u>131.*</u> 0

Table A6. Sums and percent change for emissions tracked for both PREVIOUS and current years

Table A6 measures percent change in **GHG** emissions from previous year for all scopes. In this table, categories of emissions are only included if they have non-zero values in both previous and current columns. For example, if the previous value for **GHG** emissions for Waste Anesthetic Gases in Table A1 is blank or zero, then any current year value for **GHG** emissions for Waste Anesthetic Gases in Table A1 will not be added into the current year emissions total used to calculate percent change for either **Scope 1 GHG** Emissions or Total **GHG** Emissions in Table A5.

Energy-related **Scope 1** and 2 **GHG** Emissions is the sum of Stationary Combustion of Fuels in **Scope 1** (Table A1) and all **Scope 2 GHG** emissions (Table A2).

	Previous Year (MTCO2e)	Current Year (MTCO2e)	Percent Reduction from Previous Year
Total Scope 1 GHG Emissions with Previous and Current Year Values	<u>132.*</u> 0	<u>133.*</u> 0	<u>134.*</u> 0
Total Scope 2 GHG Emissions with Previous and Current Year Values	<u>135.*</u> 0	<u>136.*</u> 0	<u>137.*</u> 0
Total Scope 3 GHG Emissions with Previous and Current Year Values	<u>138.*</u> 0	<u>139.*</u> 0	<u>140.*</u> 0
Energy-related Scope 1 and 2 Emissions with Previous and Current Year Values	<u>141.*</u> 0	<u>142.*</u> 0	<u>143.*</u> 0
Total GHG Emissions with Previous and Current Year Values	<u>144.*</u> 0	<u>145.*</u> 0	<u>146.*</u> 0

147.* Is your hospital or health system tracking **GHG** emissions as a key metric and reporting progress at regular intervals (e.g. annually)?

- ☐ Yes
☐ No

Demonstrating Climate Leadership

148.* **Renewable energy** has a significantly different **carbon footprint** than conventional energy and is an important strategy for climate change mitigation. Based on the data entered on the Energy page of this application, the **percentage of the facility's energy portfolio from renewable sources** is:

Please note that this question pulls directly from the Energy page of the application and cannot be edited on this page.

149.* Has the hospital or health system set either a **GHG reduction** or **renewable energy goal**?

- ☒ Yes
☐ No

Please indicate in the table below if the organization has set a **goal related to climate** and indicate which scope the goal applies to, the target year for reductions, the baseline year for the goal, and the projected annual reductions in metric tons of CO2e.

Goal Type	Goal applies to:	Percent reduction (if applicable)	Target Year	Baseline Year	Projected Annual Reductions in GHGs (in MTCO2e)

Carbon Net Positive	149.a* Select an option... ▼	149.b*	149.c*	149.d*	149.e*
Carbon Neutral	149.f* Select an option... ▼	100	149.g*	149.h*	149.i*
Greenhouse Gas Reduction	149.j* Select an option... ▼	149.k*	149.l*	149.m*	149.n*
Renewable Energy	149.o* Select an option... ▼	149.p*	149.q*	149.r*	149.s*
Aggressive Energy Reduction	149.t* Select an option... ▼	149.u*	149.v*	149.w*	149.x*
Other	149.y* Select an option... ▼	149.z*	149.aa*	149.ab*	149.ac*

150.* Has the facility advocated for or promoted policies or regulations that **protect public health from the causes of climate change** (e.g. testifying or submitting comments at public hearings, OpEds, sign-on letters/statements, meeting with public officials to educate or lobby)?

- ☒ Yes
☐ No
☐ Not applicable

150.a* Please select all that apply to advocacy work on protecting public health from climate change:

- ☐ At the local level
☐ At the state level
☐ At the federal level

150.b* Please describe any advocacy work around climate and health and/or provide links or attachments below.

150.c* Please attach any supporting documentation regarding advocacy work around climate and health.

151.* Has the facility provided **education** on the connection between climate and health to its staff, patients, clinicians and/or the community?

- ☒ Yes
☐ No

151.a* Please select all that apply to providing education on the connection between climate and health:

- ☐ Staff
☐ Patients
☐ Community
☐ Physicians
☐ Nurses
☐ Other Health Professionals

151.b* Please attach examples of material used for **climate and health education** (e.g., presentations, brochures, fact sheets, posters).

152.* Does the facility/health system monitor air quality and notify vulnerable patient populations?

- ☒ Yes
☐ No

152.a* Please describe air quality monitoring and notification program:

Climate Resilience

153.* Has the facility been impacted in the past year by an **extreme weather event** (e.g., forest fire, hurricane, drought, derecho, flooding)?

- ☒ Yes
☐ No

153.a* Please describe the weather event and any resulting impacts on the hospital and/or local community:

153.b* Was the response to the extreme weather event complicated by the COVID-19 pandemic?

- ☐ Yes
☐ No

Please indicate how the facility has been working on **protecting infrastructure and building community resilience initiatives** around climate change:

Analyzed local disaster risks due to climate change and its role in addressing them.	154.* Select an option... ▼
Reviewed the evidence of health risks from climate change (from local public health epidemiology/vulnerability assessments: e.g. migration of vector borne diseases, extreme heat, etc.) that may impact its community.	155.* Select an option... ▼
Participated in city, regional, or state climate resilience planning efforts.	156.* Select an option... ▼
Acted on one or more of top vulnerabilities to improve the resilience of building infrastructure, energy, water, and food systems.	157.* Select an option... ▼
Engaged in long term activities that restore and improve functioning ecosystem services in order to foster more resilient communities (e.g. working to preserve or restore ecosystem services - forests, coastal zones, wetlands, river basins, fisheries).	158.* Select an option... ▼
Developed a plan and included climate risks in both facility and regional emergency preparedness planning and implementation for addressing key health care service delivery needs during or following extreme weather events such as cold or heat waves, hurricanes, droughts, wildfires.	159.* Select an option... ▼
Completed an assessment tool (such as the Building Health Care Sector Resilience Toolkit , and developed an action plan to address climate change-related building and infrastructure vulnerabilities.	160.* Select an option... ▼

Learn more with the Climate Resilience toolkit from the US Department of Health & Human Services: **Primary Protection: Enhancing Health Care Resilience for a Changing Climate** or the HCWH and PwC report **Safe Haven in the Storm: Protecting lives and margins with climate-smart health care**.

Other Climate Program Successes

Please describe any other **projects, savings, successes or innovations** in the Climate program at your facility in 2020 in the spaces provided below. Please feel free to provide commentary and/or attach a file.

161.* Climate Program Success 1: Please describe

162.* Please attach any additional documentation (optional) for Climate Program Success 1:

163.* Climate Program Success 2: Please describe

164.* Please attach any additional documentation (optional) for Climate program Success 2:
